

O Nutricia collagen for Hair Health

Collagen is a major component in hair growth, because it fights off free radicals that can affect your hair's texture, growth and thickness.

Restoring collagen in the hair follicle can improve hair growth. O Nutricia Collagen can strengthen hair and increase the diameter of individual hairs, giving your hair an overall fuller appearance.

O Nutricia collagen with Vitamin C capsules

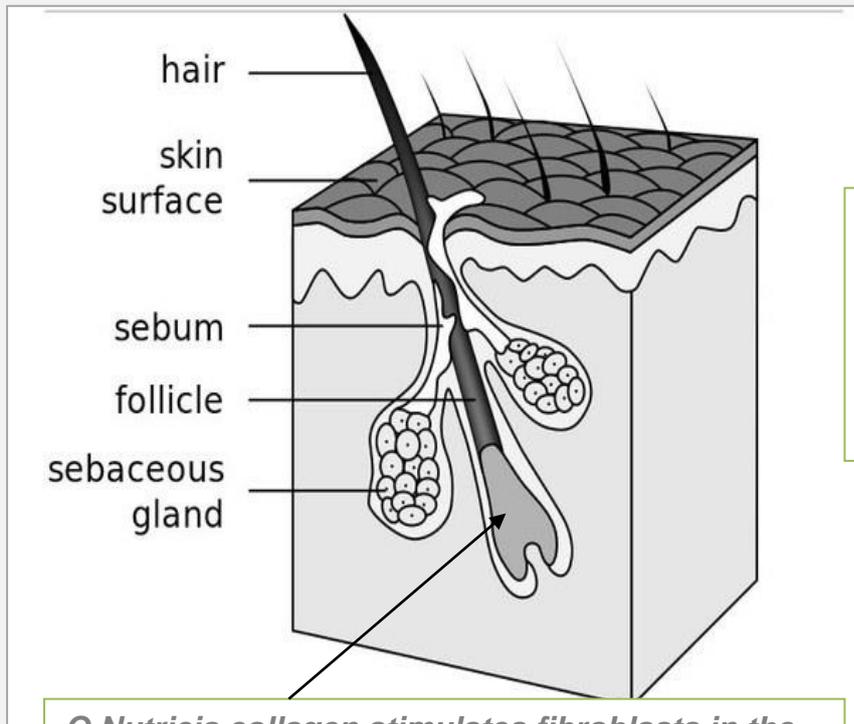

Vitamin C **maximizes** the benefits of collagen therapy in hair regeneration. Vitamin C is a water-soluble vitamin that is temporally stored in the body. It has many benefits on the overall health of the body. Benefits include helping in collagen production that **strengthens** and **maintains** elasticity to the skin, bones, blood vessels, muscles and teeth, healing of wounds, reducing hair loss, strengthens nails and enhances the growth of healthy hair.

Vitamin C is an **antioxidant** which fights free radicals. Free radicals damage the hair follicles and increase hair loss. Thereby it reduces hair loss and improves overall hair health.

As a person ages, the collagen levels goes on the decline. Poor diet and stress along with gut health imbalances are some of the factors causing collagen levels to drop. Hair is weakened, the skin suffers and nails become brittle.

Our collagen can assist in strengthening your nails! Studies indicate that by ingesting O Nutricia collagen daily has significantly positive effects on nail quality; also an improvement on nail growth. Results are seen in just a month!

Hair often breaks and becomes brittle before it thins and falls out. This weakening can be linked to lower collagen levels. **O Nutricia collagen** supplementation can help to strengthen the hair, ensuring that it doesn't break and become brittle.

Hair loss occurs because stem cells in the hair follicles become damaged or lack nourishment to produce new hair.

O Nutricia collagen stimulates fibroblasts in the Dermal papilla, including follicle development.
